Supplying nutrition.
Delivering value.
Explore . Collaborate . Fulfill

“Our purpose is to empower markets with options in providing wholesome, affordable nutrition to their consumers.”
Since 1983, MIRASCO has been supplying nutrition to regions of the world where it’s lacking and needed. Our experience in international marketplaces, and strong relationships throughout the entire supply chain have allowed us to seamlessly deliver frozen meat commodities and animal feed ingredients to these regions.

We partner with select producers, importers, distributors and processors worldwide who share our vision and purpose. While supplying affordable nutrition is where our expertise lies, partnerships are where our value lives. We transform short-term, transactional relationships into close, collaborative, long-term partnerships that are focused on delivering sustainable value.
A Legacy That Began in 1950

In 1950, Egyptian native Latif M. Rizk began his career in international trade at the age of 22. First in the import of chemical and pharmaceutical products to Egypt; then exporting snack foods to the region. In 1975, Latif immigrated to the U.S. and began exporting US
produced fats, oils and other snack-food ingredients to Egypt and surrounding markets.

As a pioneer in the USDA’s early international marketing efforts, Latif was the first to introduce frozen imported beef and poultry products to the Egyptian market, working closely with US packers and processors as buyer and shipper of these products. Together with his sons, Latif founded MIRASCO in 1983 to provide affordable nutrition from North and South America, for export to Egypt and surrounding markets. MIRASCO’s early success and longevity can be attributed to Latif’s personal and business integrity, which was key in building and maintaining strong relationships with some of the world’s largest and most reputable processors.

Today, his two sons Sami and Saher Rizk continue their father’s legacy of leveraging strong relationships and their team’s expertise to deliver affordable nutrition and uncompromised value to markets around the world.

We are very proud of the productive and rewarding journey, which brought us from where we started over thirty years ago, to where we are today, and we look forward to the future of possibilities.
An Entire Team Dedicated and Focused to Your Success

Striving to ensure that sustainable nutrition becomes accessible to everyone in the world, we expanded MIRASCO’s presence into the most important supply regions and destination markets. Our partner-first approach, together with our ability to be nimble and flexible in responding to the needs of both customers and suppliers, supports the generation of efficiency and long-term growth.

Our business has grown based on long-term partnerships and mutual trust. It’s why our customers depend on us for consistent supply. And it’s why our supply chain partners can rely on us as a dependable marketer of their products.

While commodities are what we physically supply, we seek to deliver more. Integrity. Excellence. Value. These are the drivers behind every action we take.
At MIRASCO, we don’t just supply nutrition. We deliver incomparable value by completely surrounding ourselves with our partners. Through our service-focused mindset, we create solutions that add value for our customers, so that they may in turn add value to us.

By partnering with a select group of producers, importers, distributors and processors who share our vision, we help improve how the world accesses affordable nutrition.

Our relationships with partners are not simply transactional; they are motives aimed to build strong, long-lasting partnerships.
Logistics Expertise
“Managing the details.”

Our import and export operations are never outsourced and are managed internally by Mirasco’s specialists. Our traders work hand-in-hand with suppliers to secure product that meets destination market standard.

Our logistics specialists directly manage multimodal transit of goods to their final destination, and ensure that shipping documents are prepared accurately and on time.

Mirasco’s experienced finance department is always prepared to meet requirements by providing transit finance options as needed.
Products

FROZEN
Collaborative relationships with suppliers and customers, allows Mirasco to virtually assure a consistent supply of frozen products in sufficient volumes to meet market needs.

Beef
World beef supply is affected by a number of dynamics: rising demand, wide fluctuations in production costs and constant changes in trade laws. Our partnerships with leading producers and processors in key regions assure our customers reliable supply of the full range of bone-in and boneless primal cuts, as well as variety meats and offal.

Poultry
Poultry helps meet the nutritional needs of nearly every culture around the world. In many countries, chicken and turkey consumption outpaces production, creating a gap to be filled through imports. Mirasco’s presence at the center of poultry supply regions in North and South America allows us to bridge this gap.

Seafood
Most regions in the world are experiencing rising demand for seafood. Based on customer needs, Mirasco focuses on specific species, both wild caught and farmed. Packaged under our own brands and our supplier partners’ labels, we provide whole-round fish as well as fillets—processed, packed, and frozen either on land, or at sea on factory ships.
FEED INGREDIENTS

To achieve the best possible conversion rates in the production of livestock, poultry and fish, farmers and feed, mill operators need a reliable source for a variety of ingredients and assistance with advanced formulation methods. Through our network of specialty grain, protein and feed additive producers in key supply regions, MIRASCO has become a trusted partner to feed ingredient users.

Product Safety and Quality Assurance

Our suppliers are trusted partners in documenting food safety and quality assurance throughout the entire food chain—from animal feeding and grow-out through final product processing and packaging.

All products purchased and shipped by Mirasco are processed, packaged and stored to meet or exceed each country of origin’s agricultural and food safety requirements including: Good Manufacturing Practices (GMP), HACCP (Hazard Analysis Critical Control Points) and SSOP (Sanitation Standard Operating Procedures).

Wherever our products originate, Mirasco will never compromise food safety or quality.

Social Responsibility

At MIRASCO we strongly believe in giving back to the communities and regions of the world we serve. We are committed to ensuring that our work properly reflects our social-awareness and global citizenship.
